

LIGHT SHOW

Hold a green leaf in the sunlight. What colour do you see? Okay, simple... **Green**, right? Well, the answer isn't that simple. While you may see only green with your naked eye, there are actually **many more colours** than that.

Would you believe there are blue, blue-green, red, orange, and yellow?

Not only that, but these colours are brilliant and fluorescent – they actually glow! It's true! Plants take in sunlight, and the substances in them react with the light to produce a **rainbow** of magnificent colours that we call **fluorescence**.

But we can't see these colours unless we have special equipment with very sensitive filters. These filters block out the overpowering green reflections of most leaves so we can enjoy the rest of the light show. And what a light show it is!

Even green stems produce all the colours.

How wonderful that plants can react to **sunshine** in this beautiful way!

And what about us? Something similar happens to us when we let the **light of Jesus** shine through us. His light fills us, and our spirit returns a **rainbow of beauty** to the world. Our 'fluorescence' shows when we **love God**, **help others**, and **take care of God's creation**. Our light doesn't have to remain hidden – **Jesus is the filter** that reveals it to others. He is the power behind your own personal light show from the Son.

You are the light of the world. A city on a hill cannot be hidden. – Matthew 5:14
